Santiago Osorio Quintero

BackEnd Developer

osorio1708@gmail.com | +573022395958 | GitHub | Linkedin | Website

Skills

- Javascript | Typescript | C# | Java | MSSQL | PosgreSQL | MongoDB |
- GraphQL | Express | .NET Core | Spring Boot | Apollo Server | UnitTest | E2E Testing | Automation testing | Jest | JUnit | Mockito | XUnit | Git | Mocha | Chai |
- Micro Services | DDD | Docker | Azure | Jenkins | GitHub Enterprise | Splunk | SonarQube | CI / CD |

Experience

July 2022 - October 2023 | Zemoga - Walmart | NodeJS Developer

- Improved code quality by reducing code smells through SonarQube analysis, ensuring a more maintainable codebase.
- Enhanced delivery operations by integrating detailed information, and optimizing the delivery process for higher customer satisfaction.
- Expert in TypeScript and GraphQL, developed scalable features, enhancing application performance and user experience.
- Ensured reliable applications through seamless deployments and rigorous testing methodologies, contributing to flawless software functionality.
- Collaborated with cross-functional teams, fostering teamwork and creative solutions, significantly benefiting project outcomes.

October 2021 - July 2022 | XpertGroup - Puntos Colombia | FullStack Developer

- Engineered a seamless points-based freight payment functionality, streamlining payment flows and enhancing user experience significantly.
- Managed both frontend and backend systems, ensuring their seamless integration. Facilitated smooth communication between the frontend built with React and the backend powered by .NET Core and Express.js.
- I have successfully integrated new payment gateways into the e-commerce platform, expanding customer payment options and enhancing transaction security.
- Implemented performance optimization strategies, enhancing the platform's responsiveness and user interface, and improving customer engagement and satisfaction.
- Collaborated effectively with diverse teams, translating business requirements into technical solutions. Fostered strong teamwork and innovative problem-solving, ensuring project success and customer delight

February 2021 - October 2021 | TCS - Bancolombia | RPA Developer

- Played a pivotal role in automating company processes, significantly reducing labor costs and effort. Utilized tools like Automation Anywhere and C# to develop efficient robotic solutions, enhancing overall workflow efficiency.
- Implemented and maintained automation processes, ensuring their seamless functionality. Provided dedicated support, troubleshooting issues promptly, and optimizing automated workflows, leading to sustained operational excellence.
- Engineered cost-effective automation strategies, maximizing resource utilization and minimizing manual intervention. Achieved substantial savings for the company while ensuring consistent, error-free processes.

Education

January 2016 - June 2021 | Bachelor's Degree | System Technologist
Instituto Tecnologico Metropolitano - Medellin, Colombia

October 2023 | Graph Developer - Professional
Apollo ODYSSEY - Certification

April 2022 | EF SET English Test
C2 Proficient - Certification
